ANOTIDA LLOYD DZINOTYIWEI

SOFTWARE ENGINEER

Johannesburg, South Africa | anodzino@gmail.com | 066 230 9680 | linkedin.com/in/anotida-dzinotyiwei117a4a2a0

EDUCATION

BSc IT — Software Engineering — Eduvos | *Expected 2027*
• GPA: 3.7 | Multiple Top Achiever Awards | Golden Key International Honour Society

PROFESSIONAL EXPERIENCE

Observability Stack Developer — Decision Boundary Alpha | *Feb 2026 – Present*
• Build a real-time Python telemetry pipeline for live ML-system observability, using Apache Kafka and Flink for event-driven stream processing.
• Use Redis for low-latency caching and state management, with Grafana and Prometheus dashboards for real-time monitoring and alerting.

Full Stack Software Engineer — Dala | *Mar 2026 – Jun 2026*
• Led a 3-engineer team building a cross-platform service marketplace, architecting Flutter/Swift clients with a Java Spring Boot backend.
• Owned technical decisions, sprint planning and code reviews across the engineering team.

Software & Innovations Developer — Kenac Computer Systems | *Nov 2025 – Feb 2026*
• Developed production full-stack business and client-facing systems using Python, SQL and modern web technologies across the SDLC.
• Translated stakeholder requirements into reliable technical solutions across corporate software projects.

Founder & Full Stack Developer — VirtuKey Technologies | *Apr 2024 – Present*
• Founded a software technology company and shipped multiple production management and business systems from concept through deployment.
• Own system architecture, backend logic, frontend implementation, cloud infrastructure and technical delivery.

Software Development Intern — Veneka | *Jan 2024 – Feb 2024*
• Contributed to enterprise software development in fintech while collaborating with technical and non-technical teams.

TECHNICAL PROJECTS

FinPort | FastAPI, Next.js, SQLAlchemy, PostgreSQL, Redis
• Built a full-stack investment portfolio tracker supporting real-time monitoring across stocks, crypto, ETFs and other asset classes.
• Designed APIs for portfolios, assets, recommendations and advanced analytics, with SQLAlchemy persistence and Redis-backed infrastructure.

ServeHub | Java 21, Spring Boot 3, Next.js, PostgreSQL, Redis, WebSockets, Docker
• Built a full-stack service marketplace connecting customers with verified providers, including discovery, bookings, real-time chat, reviews, payments and provider dashboards.
• Implemented JWT authentication and RBAC, Redis caching/rate limiting, PostgreSQL persistence, WebSocket messaging, Docker deployment and Prometheus-ready observability.

TradeOS | NestJS, Next.js, AI
• Built a global trade decision-support platform covering documentation, compliance checks, risk assessments and AI-assisted trade guidance.

TECHNICAL SKILLS

Languages: Python, Java, C#, JavaScript/TypeScript, SQL, Swift
Frameworks & Mobile: Spring Boot, NestJS, Next.js, Flutter
Data & Distributed Systems: Apache Kafka, Apache Flink, Redis
Cloud & DevOps: AWS, Cloud Infrastructure, Git
Observability: Grafana, Prometheus

ACHIEVEMENTS

Multiple Top Achiever Awards — Eduvos (2024–2025) | Golden Key International Honour Society | AWS ExecLeader 2024 & 2025
